

Welcome in. Here's exactly how the next 28 days work.

You joined because you're the bottleneck in your own practice. In four weeks you'll have a system that runs your follow-up, onboarding, and scheduling in the background -- built on tools you already own, with zero new software to buy.

What you got with this purchase

- Week 1 - The Practice Audit Workbook + Leak Calculator spreadsheet (find where the hours go)
- Week 2 - Two complete build guides with copy-paste code: Lead Follow-Up Engine and Client Onboarding Engine (pick your worst leak; I build one live with the cohort)
- Week 3 - The Connected Flow Blueprint (wire the systems together so nothing falls through)
- Week 4 - The Implementation Plan template + the full Security Practice OS demo video
- Direct access to me for all 28 days - text (863) 209-7940 anytime

The weekly rhythm

- 1 Each Monday you get the week's focus by email. Do the worksheet or build that week (60-90 minutes max).
- 2 One live working session per week with the cohort - I build, you follow along or ask questions. Invite comes by email.
- 3 Stuck at any point? Text me. That's what the 28-day access is for. (863) 209-7940.
- 4 Week 4 ends with a decision: finish the rest yourself with what you've learned, or have us build the complete OS done-for-you (\$3,500, 2-week build, 7-day free trial first).

The guarantee (in writing)

If you finish Week 2 and don't have at least one automation live in your practice, email keenan@bluehippocyber.com with the word REFUND and you get every dollar back. No questions, no hoops.

Start with the Week 1 workbook today. It takes 45 minutes and most consultants find \$20K+ of annual leak on the first pass.
